SUYASH JAISWAL

Software Developer | React.js | Node.js | Spring | REST APIs | Scalable Web Applications

+917869573340 suyashjaiswal2001@gmail.com https://www.linkedin.com/in/suyash-jaiswal-a5793b211/

SUMMARY

Software developer with comprehensive experience in building and optimizing scalable fintech applications using **React.js, Node.js, and MongoDB.** Skilled in crafting responsive UI and secure backend services, driving improvements in performance and user engagement. Demonstrated success in accelerating project delivery and stabilizing platforms through effective bug resolution and API optimization. Currently deepening knowledge in system design and distributed architectures with **Spring Boot and Java frameworks.**

SKILLS

Languages

C++ C HTML/CSS Java JavaScript Typescript SQL

Technologies

React.js SpringBoot Node.js Express.js Tailwind CSS

Postman Next.js REST Apis Cloudinary MySQL JWT

bcrypt Kafka Spring Data Microservices Jest RTL

Database

MongoDB MySQL Mongoose

EXPERIENCE

Software Developer

Dice

03/2024 - Present Bangalore, Onsite

- Designed and implemented responsive user interfaces using modern frontend technologies (React.js, HTML5, CSS3, JavaScript), increasing page load speed by 30% and enhancing mobile responsiveness to boosting user engagement metrics by 25%.
- Tracked and resolved over 100 bugs, implementing solutions that reduced user-reported issues by 40%, elevating platform stability and user satisfaction scores by 20%.
- Collaborated onsite at Flipkart via Dice's partnership. Optimized Finos, a travel expense and procurement platform. Efforts sped up project delivery by 15%, enabling faster adoption by 5+ teams.
- Collaborated with cross-functional teams to integrate new APIs, increasing data accuracy and reducing backend processing time by 20%.
- Developed **RESTful backend APIs en**abling efficient communication between frontend services and databases.
- Worked on end-to-end integration of Make My Trips **B2B travel bookings** (Flights, Train, Cab, Bus, Hotel) into Dice's Expense Management system.Onboarded and customized workflows for large enterprise clients, including **Delhivery, United Breweries, Bajaj Auto, Mahindra**, and **Quess Corp etc.**

KEY ACHIEVEMENTS

Boosted Web Performance
Accelerated page load speed by 30%, resulting in a 25% increase in user engagement.

Enhanced Platform Stability
Identified and fixed 100+ critical bugs, decreasing user-reported issues by 40%.

Accelerated Project Delivery
Contributed to project delivery acceleration by 15%, adopted by 5+ teams

Scalable Data Export System
Created an asynchronous CSV export pipeline using Kafka, offloading heavy data generation from the frontend and improving download reliability and system performance.

Optimized Backend APIs
Reduced backend processing time by 20% by optimizing REST APIs

EDUCATION

Bachelor of Engineering in Computer Science

Institute of Engineering and Technology

12/2020 - 05/2024 Indore, M.P.

PROJECTS

Expense Tracker

11/2024

https://github.com/suyash-26/Expense_Tracker

An efficient expense tracker that simplifies tracking, categorizing, and approving employee expenses with a single-level approval process

- Developing an expense tracker application that allows users to log expenses and send them to designated managers for approval, enhancing efficiency in financial reporting.
- Implemented user authentication with secure login/logout functionality, utilizing bcrypt for password hashing and encryption, ensuring 100% security for user credentials.
- Planned and integrated a role-based approval system for managers to review and approve or reject expenses, with an expected boost of at least 30% in accountability and approval workflow efficiency.

Share Me

08/2024

https://github.com/suyash-26/shareme_backend

- Spearheaded the integration of familiar social media features with cutting-edge technology.
- Engineered using ReactJS, MongoDB, NodeJS, ExpressJS, JWT, Cloudinary, to ensure functionality such as secure authentication.
- Built profile creation and image upload features, driving a 30% increase in feature usage and delivering a seamless user interface that improved new user adoption.
